
Pallet for storage of cylinders.

Approved for lift.

The cylinder pallet is useable for storage of gas cylinders and approved for lift.

It is designed for outdoors storage of cylinders and for lifting with crane internally on the workplace. Suitable for manufacturing industry such as construction sites and shipyards.

The pallet is market with user and safety instruction as well as warning signs. Flammable and non – flammable gases are stored in separated pallets with necessary safety distance.

The pallets are produced in galvanized steel and with protection of the cylinders from all sides. The hinged door can be kept locked with padlock and chain.

The four lifting eyes in the top are used when lifting the pallet. Each pallet is delivered with certificate in a separated watertight plastic case, which is fastened on the pallet. Control and approval is done by authorized certification company. Recertification is ensured by our ICC system.

Technical data

- Produced and CE market according to the EN Machine Directive
- Certified for approved lift
- Width 850 mm
- Depth 1050 mm
- Height 2180 mm
- Max. total weight 1500 kg
- Weight without cylinders 240 kg
- Max. 12 pc 50 litre cylinders
- Tightening strap against cylinder turn over
- Microship for traceability
- Market with user and safety instruction
- Certified Mark with actual year and month
